

Thunderbike Ultra – Eligible Bike List

This list comprises some examples of machines which are eligible and have participated in the championship previously. It is intended as a guide only, as the rules themselves are the main indication of eligibility. Additionally, eligibility can occasionally be granted on a case by case basis for machines that are within the spirit of the class.

Please Note: Machine **eligibility** does not infer Machine **Compliance** – the responsibility remains with the rider to ensure that the machine complies to the maximum power and power to weight statistics appropriate, as stated in the main Thunderbike Rules

If your machine does not appear in the list but falls within the stated manufacturing periods in the rules, please contact the eligibility officers for an official decision.
